Notes:

- [Adobe Premiere](#) v14.0 running on Windows 10 64-bit and OSX 10.13.6. Compatibility requires installation of the NewTek NDI File Reader Codec for Adobe found in NDI Tools v4. This product supports growing files. Inside Adobe Media Encoder preferences, make sure the 'Import Premiere Pro sequences natively' option is not checked.
- [Avid Media Composer First](#) v2019.11 running on Windows 10 64-bit and OSX 10.13.6. For any video formats not supported, use the TriCaster Export tool to convert recording into ProRes 422 format. On OSX, interlaced content would import correctly, but progressive content was distorted.
- [DaVinci Resolve](#) v16.1.1 running on Windows 10 64-bit and OSX 10.13.6. For any video formats not supported, use the TriCaster Export tool to convert recording into ProRes 422 format.
- [Final Cut Pro X](#) 10.4.6 running on OSX 10.13.6. For any video formats not supported, use the TriCaster Export tool to convert recordings into ProRes 422 format. Interlaced content would import correctly, but progressive content was distorted.
- [Apple iMovie](#) 10.1.11 running on OSX 10.13.6. For any video formats not supported, use the TriCaster Export tool to convert recordings into ProRes 422 format. Interlaced content would import correctly, but progressive content was distorted.
- [HitFilm Express](#) v13.1 running on Windows 10 64-bit and OSX 10.13.6. For any video formats not supported, use the TriCaster Export tool to convert recording into ProRes 422 format.
- [Lightworks](#) 14.6 beta running on Windows 10 64-bit and OSX 10.13.6. Video displays correctly, but audio is distorted. For any formats not supported, use the TriCaster Export tool to convert recording into ProRes 422 format.
- [FFmpeg Encoder GUI](#) v2.2.10 running on Windows 10 64-bit.
- [FFWorks](#) v1.6 with v4.2.1 FFMPEG executable running on OSX 10.13.6.
- [HandBrake](#) v1.3 running on Windows 10 64-bit and OSX 10.13.6.
- [VLC Player](#) v3.08 running on Windows 10 64-bit and OSX 10.13.6.

Quick training video link if you need help with how to use the TriCaster Export Tool to create other media formats. <https://youtu.be/xSINRjorfYQ>

NOTE: When moving files between systems, keep the .mov and .ndi sidecar files together for best performance and compatibility. If the .mov file is renamed, the .ndi file must be renamed to match.
